

## **How can Food Technology support your future?**

We offer Food Technology to all students at KS3 and as an option at GCSE. We encourage your continued study in this fantastic subject but we understand that choice and personal interest are important aspects of worthy study. Whether you have continued your study of Food into GCSE or not you will have gained access to this enriching subject and its study will have taught you to think differently and deeply.

Teesside University BSc Food Science and Engineering faculty states that “ as the world population increases, food technologists are challenged with developing innovative applications in agricultural technology, biotechnology and processing of raw food materials, as well as understanding the link between food, nutrition and health”

Many people who study Food Technology go on to pursue careers in fields such as:

- Food Technologist
- Food Product Development
- Food Scientist
- Nutrition/ Dietician
- DT Teacher
- Chef/Catering Industry
- Hospitality Management
- Event Planner
